

Be Well Solutions

Dietetic Internship

Internship Schedule at a Glance

Overview

Proposed rotation schedules may vary by intern depending on the hours agreed upon with the preceptor or the intern's individual preferences. All interns are required to complete a minimum of 1,040 rotation-based supervised practice hours, along with at least 46 hours of BWS DI-administered practice hours. Students must also consider national and school holidays when planning their rotation schedules.

Example Schedule: 5-Rotation Option

Event	Approximate Months <i>(Dates may vary by intern)</i>	Approximate Months <i>(Dates may vary by intern)</i>
Match Cycle	Fall (November)	Spring (April)
Orientation (>24 hours)	February/March	August/September
Clinical Rotation (>320 hours)	March - April	September - October
Foodservice Rotation (>80 hours)	May	November
Community Rotation (>160 hours)	May - June	November - December
Wellness Rotation (>320 hours)	June - August	January - February
Wellness Workshop (>6 hours)	July	January
Emphasis Rotation (>160 hours)	August - September	March
Conference Meetings (>16 hours)	Dates TBA during Orientation	Dates TBA during Orientation
Exit Class & Graduation	October	April
Total Hours: 1,086	8 months	8 months

Other Considerations

Choosing the 4-Rotation Option? Interns will increase the length of one or more of their rotations by 160 hours instead of completing an Emphasis Rotation. In general, hours for any rotation may be increased for either the 4 or 5-rotation option, time permitting.

Remote conferences are held throughout the program for interns to gather, share updates, and present assignments. Interns will also attend a full-day remote Wellness Workshop midway through the program.
